Connecting the Bible and Science

Welcome to the Fall 2026 season of NJBibleScience meetings!

Our meetings start at 7pm

All meetings are on third **Thursday's** of the month. Held at Calvary Chapel Old Bridge at 123 White Oak Lane, off route 516 just west of route 9. Meetings are in Chapel Rooms A & B upstairs.

Thursday September 17, 2026

Scanga Lecture: "The Scopes Trial"

Jeff Scanga will be speaking on the famous "Scopes Trial" and its long-lasting effects on society and the teaching of Creation Science in the classroom.

Thursday October 15

Video: "James Webb Space Telescope (JWST) Findings"

This video with Christian astronomer Jason Lisle discusses the latest JWST findings and how they agree with biblical expectations, very much contrary to secular/evolutionary theory.

Thursday November 19

Guest Lecturer Art Manning: "Extraterrestrial Life vs. the Bible"

We welcome guest lecturer Art Manning who has published many articles in the creation science literature.

How do we answer those who want to know what we as Christians believe about this hot topic? Learn about the history of the search for extraterrestrial life, including NASA's search for life on Mars and SETI - the search for extraterrestrial intelligence by sending and listening for radio communications. Also features a brief review of Hollywood's efforts to bolster belief in aliens. Most important, a clear, concise, treatment of this controversy is given from a biblical perspective. If we are knowledgeable about this topic, we can turn it into an opportunity for sharing the gospel!
